For stockists, see page 193

Our Space story was shot on location in Italy at Le Vaschette, a 2km-long rocky area south of Livorno.

Excavated by the Etruscans, it produced dark *pietra serena* and yellowish *pietra ruspa* stone, with sponge-like textures caused by alveolar erosion. Partly submerged due to rising sea levels, it is now dotted with little pools (*vaschine*) and is a popular spot for locals in search of a refreshing summer dip.
